

## MEDICAL INVENTORY MANAGEMENT

### **Introduction:**

The Medical Inventory Management System is a comprehensive Salesforce application designed to streamline and manage various operational aspects of the medical inventory. It can efficiently maintain supplier details, manage purchase orders, track product details and transactions, and monitor expiry dates of products, thereby improving operational efficiency, data accuracy, and reporting capabilities.

### **Project Overview:**

This project is a comprehensive Salesforce application to streamline and manage various operational aspects of medical inventory. The system aims to efficiently maintain supplier details, manage purchase orders, track product details and transactions, and monitor the expiry dates of products. Maintain detailed records of suppliers, including contact information. Catalog product information, including descriptions, stock levels. Monitor and track product expiry dates to avoid using expired items. Comprehensive reports to track supplier performance, and purchase orders.

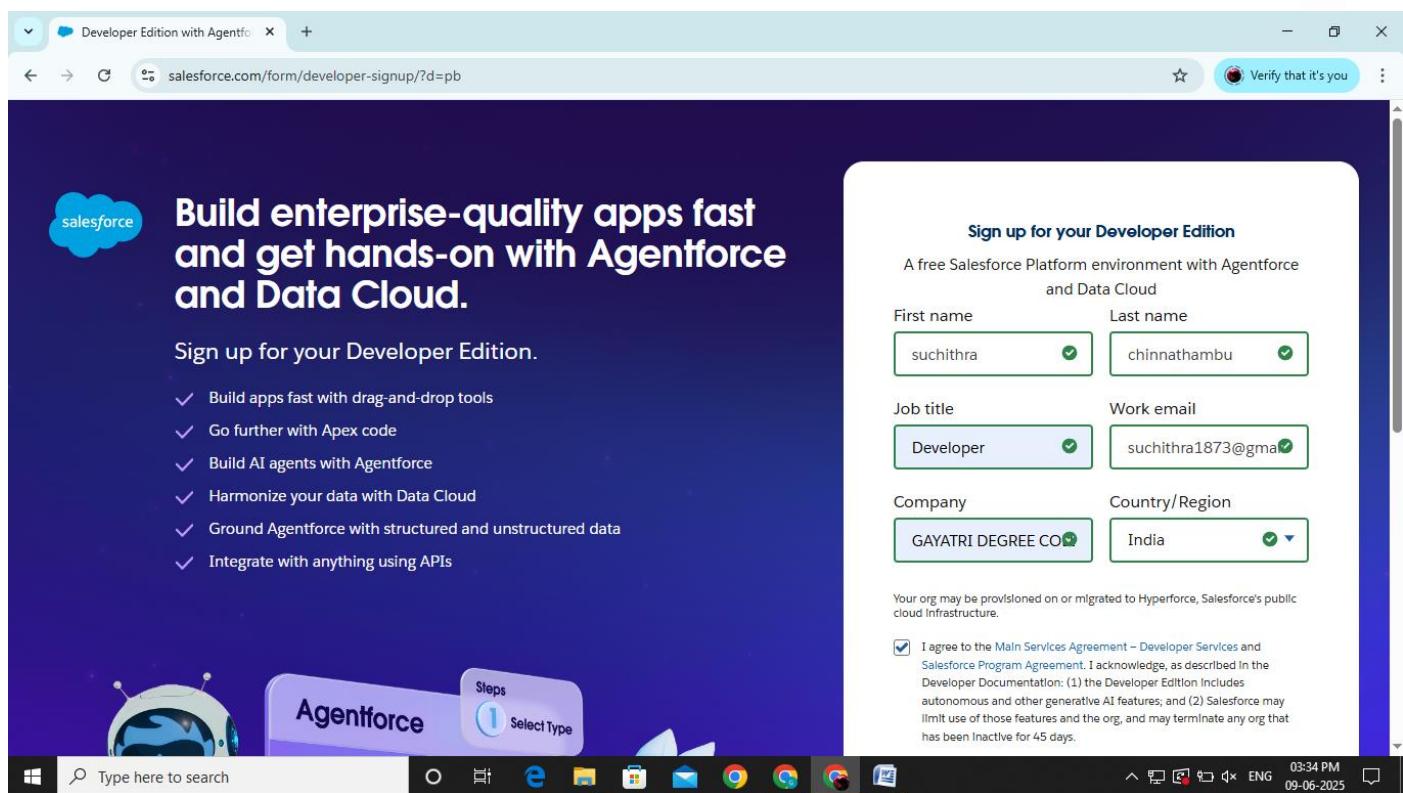

# MEDICAL INVENTORY MANAGEMENT

## Milestone – 1

### Salesforce Account

#### Activity 1: Creating Developer Account

1. Creating a developer org in salesforce.
2. Go to <https://developer.salesforce.com/signup>
3. On the sign up form, enter the following details :
  - First name : SUCHITHRA
  - Last name : CHINNATHAMBU
  - Job Title : Developer
  - Work Email : suchithra1873@gmail.com
  - Company : GAYATRI DEGREE COLLEGE TIRUPATI
  - Country/ Region : INDIA

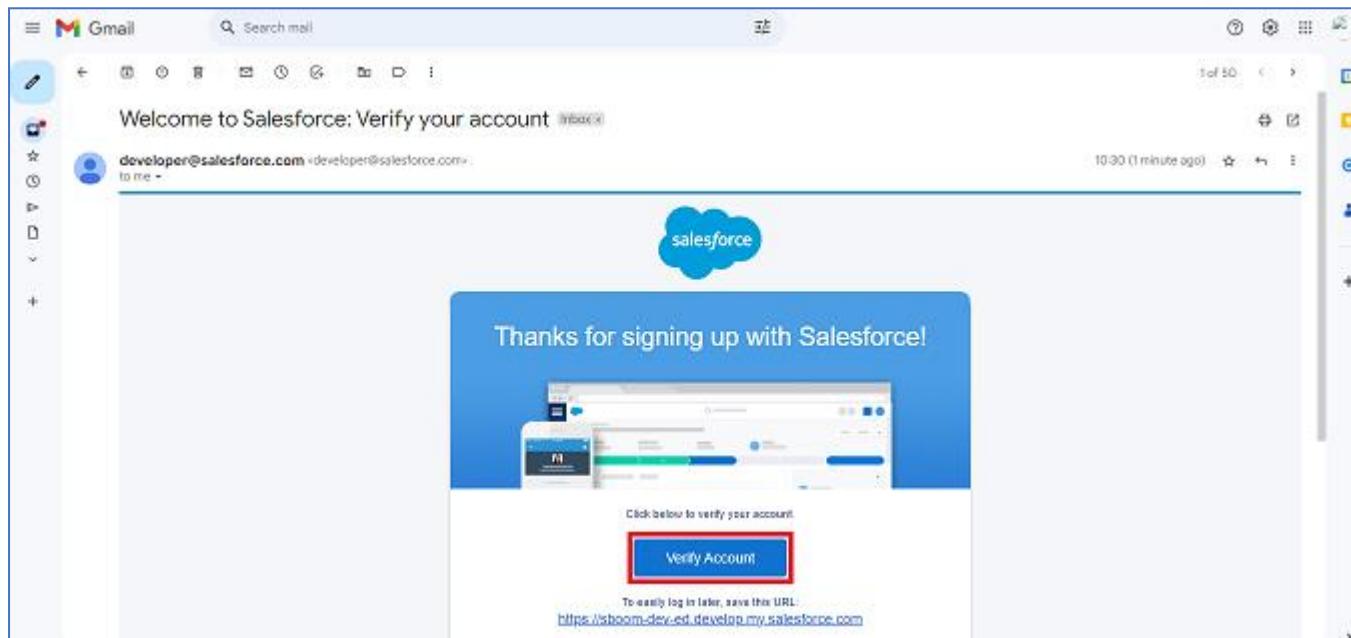

4. Click on sign me up after filling these.

## MEDICAL INVENTORY MANAGEMENT

### Activity 2: Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account
3. Give a password and answer a security question and click on change password.

A screenshot of a "Change Your Password" page. The title is "Change Your Password". It instructs the user to enter a new password for "lead@sb.com" and lists requirements: "8 characters", "1 letter", and "1 number". A red box highlights the "New Password" field, which contains a masked password and the status "Good". Another red box highlights the "Confirm New Password" field, which also contains a masked password and the status "Match". Below these are fields for "Security Question" (set to "In what city were you born?") and "Answer" (containing "asdfghjkl"). A red box highlights the "Change Password" button at the bottom.

4. Then you will redirect to your salesforce setup page.

## MEDICAL INVENTORY MANAGEMENT

The screenshot shows the Salesforce Setup Home page. At the top, there's a search bar labeled "Search Setup" and a toolbar with various icons. The main area is titled "SETUP Home" and features three cards:

- Get Started with Einstein Bots**: Launch an AI-powered bot to automate your digital connections. Includes a "Get Started" button.
- Mobile Publisher**: Use the Mobile Publisher to create your own branded mobile app. Includes a "Learn More" button.
- Real-time Collaborative Docs**: Transform productivity with collaborative docs, spreadsheets, and slides inside Salesforce. Includes a "Get Started" button.

The left sidebar contains navigation links for Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and Administration (with a "Users" link). A "Create" button is located in the top right corner of the main content area.

# MEDICAL INVENTORY MANAGEMENT

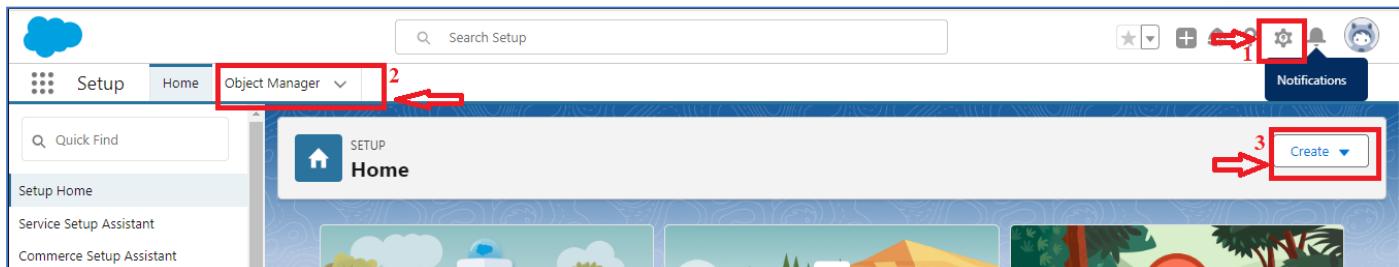

## Milestone 2

### Objects Creation

#### Activity 1: Creating a Product Object

From the setup page

1. Click on Object Manager

2. Click on Create >> Click on Custom Object.

3. Enter the label name as **Product**

4. Enter Plural label name as **Products**

The screenshot shows the 'New Custom Object' setup page. It has a title 'SETUP New Custom Object'. Below it is a 'Custom Object Definition Edit' form with several sections. In the 'Custom Object Information' section, there are two input fields: 'Label' (containing 'Product') and 'Plural Label' (containing 'Products'). Both fields have red boxes around them with numbers 4 and 5 respectively. There is also a checkbox 'Starts with vowel sound' which is unchecked. The 'Object Name' field contains 'Product' with a red box around it and a red number 6. The 'Description' field is empty. At the bottom, there are 'Context-Sensitive Help Setting' options: 'Open the standard Salesforce.com Help & Training window' (radio button selected) and 'Open a window using a Visualforce page'.

5. Enter Record Name as **Product ID**

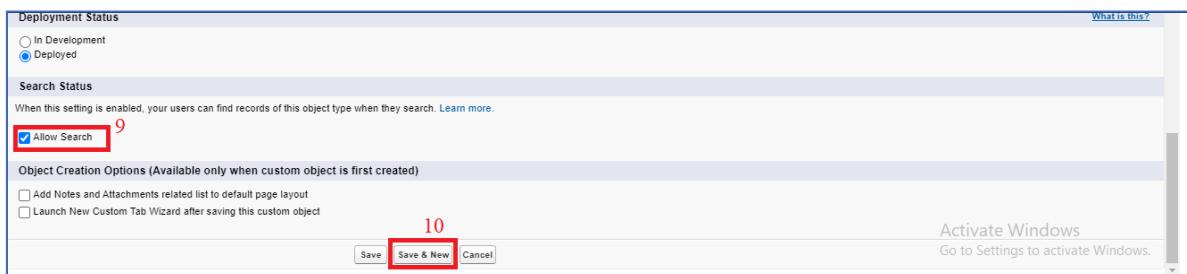

6. Select Data Type as **Text**

7. Select Allow reports.

The screenshot shows the 'Enter Record Name Label and Format' setup page. It has a title 'Enter Record Name Label and Format'. The 'Record Name' field contains 'Product ID' with a red box around it and a red number 6. The 'Data Type' dropdown contains 'Text' with a red box around it and a red number 7. Below these fields is a warning message: 'Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.' Under the heading 'Optional Features', there is a list of checkboxes: 'Allow Reports' (checked), 'Allow Activities', 'Track Field History', 'Allow in Chatter Groups', and 'Enable Licensing'. The 'Allow Reports' checkbox has a red box around it and a red number 8.

## MEDICAL INVENTORY MANAGEMENT

8. Select Allow search.

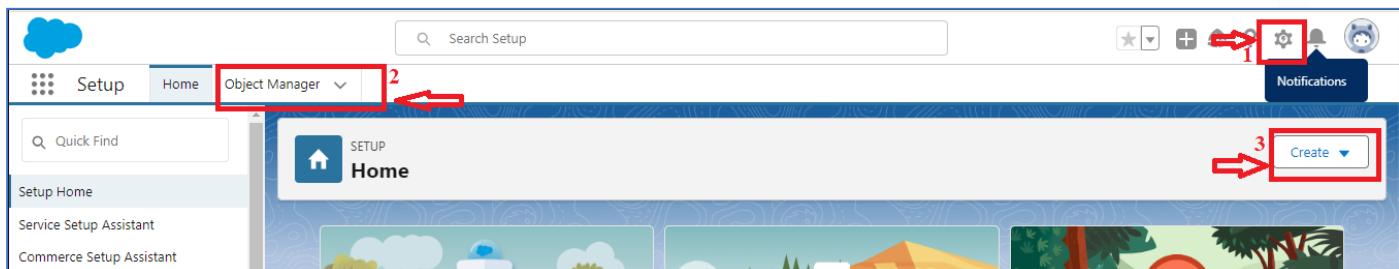

9. Click on Save and New

### Activity 2: Creating a Purchase Order Object

From the setup page

1. Click on Object Manager

2. Click on Create >> Click on Custom Object.

3. Enter the label name as **Purchase Order**

4. Enter Plural label name as **Purchase Orders**

The screenshot shows the 'Edit Custom Object' page for 'Purchase Order'. The 'Custom Object Definition Edit' section has three buttons: 'Save', 'Save & New' (highlighted with a red box), and 'Cancel'. The 'Custom Object Information' section contains fields for 'Label' (set to 'Purchase Order') and 'Plural Label' (set to 'Purchase Orders'). There is also a checkbox for 'Starts with vowel sound'. Below this, there is a note about the 'Object Name' field, which is set to 'Purchase\_Order'.

5. Enter Record Name as **Purchase Order ID**

6. Select Data Type as **Text**

7. Select Allow reports.

## MEDICAL INVENTORY MANAGEMENT

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

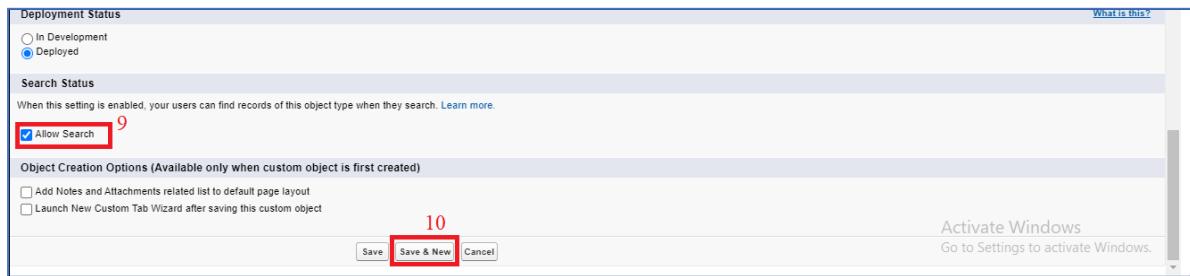

Record Name: Purchase Order ID Example: Account Name

Data Type: Text Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

Allow Reports  
 Allow Activities

### 8. Select Allow search.

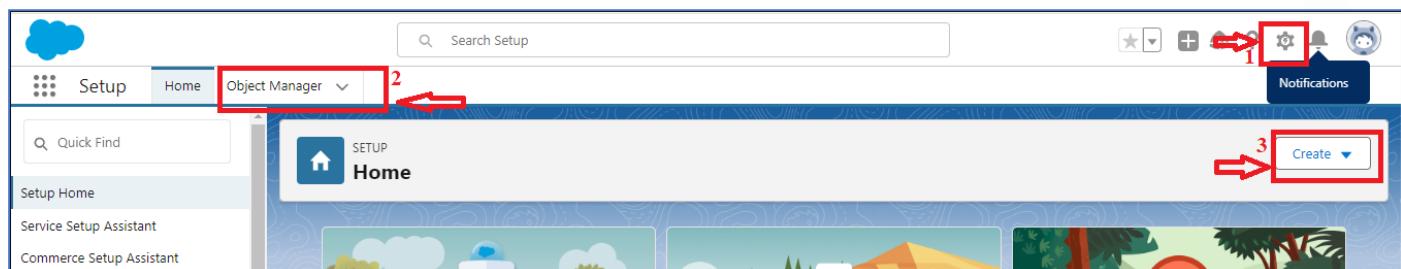

### 9. Click on Save and New

## Activity 3: Creating a Order Item Object

From the setup page

### 1. Click on Object Manager

### 2. Click on Create >> Click on Custom Object.

### 3. Enter the label name as **Order Item**

### 4. Enter Plural label name as **Order Items**

# MEDICAL INVENTORY MANAGEMENT

## Milestone -3

### Tabs Creation

#### Activity 1: Creating a tab for Product Object

1. Go to the setup page >> type Tabs in Quick Find bar
2. Click on tabs
3. Click on New (under custom object tab).

The screenshot shows the Salesforce Setup interface. In the top left, there's a navigation bar with 'Setup', 'Home', and 'Object Manager'. Below it is a sidebar with sections like 'Feature Settings', 'Analytics', 'Tableau', 'Tableau Embedding', 'User Interface' (which has 'Loaded Console Tab Limit' and 'Rename Tabs and Labels' under it), and 'Tabs'. A red box labeled '1' is around the search bar where 'tab' is typed. Another red box labeled '2' is around the 'Tabs' link in the sidebar. The main content area is titled 'Custom Tabs' and contains sections for 'Custom Object Tabs', 'Web Tabs', and 'Visualforce Tabs'. Each section has a 'New' button and a 'What Is This?' link. A red box labeled '3' is around the 'New' button in the 'Custom Object Tabs' section. At the bottom right of the main content area, there's a link 'Activate Windows'.

4. Select Object(Product) >> Select the tab style

The screenshot shows the 'Step 1. Enter the Details' page for creating a new tab. The title bar says 'SETUP Tabs Step 1 of 3'. The page asks to choose a custom object for the tab. It has a dropdown 'Object' set to 'Product' and a 'Tab Style' dropdown set to 'Stethoscope'. There's also an optional field for a 'Splash Page Custom Link' with a dropdown set to '--None--'. Below that is a 'Description' field with a large empty text area. At the bottom right, there's a 'Next' button with a red box around it and a 'Cancel' link.

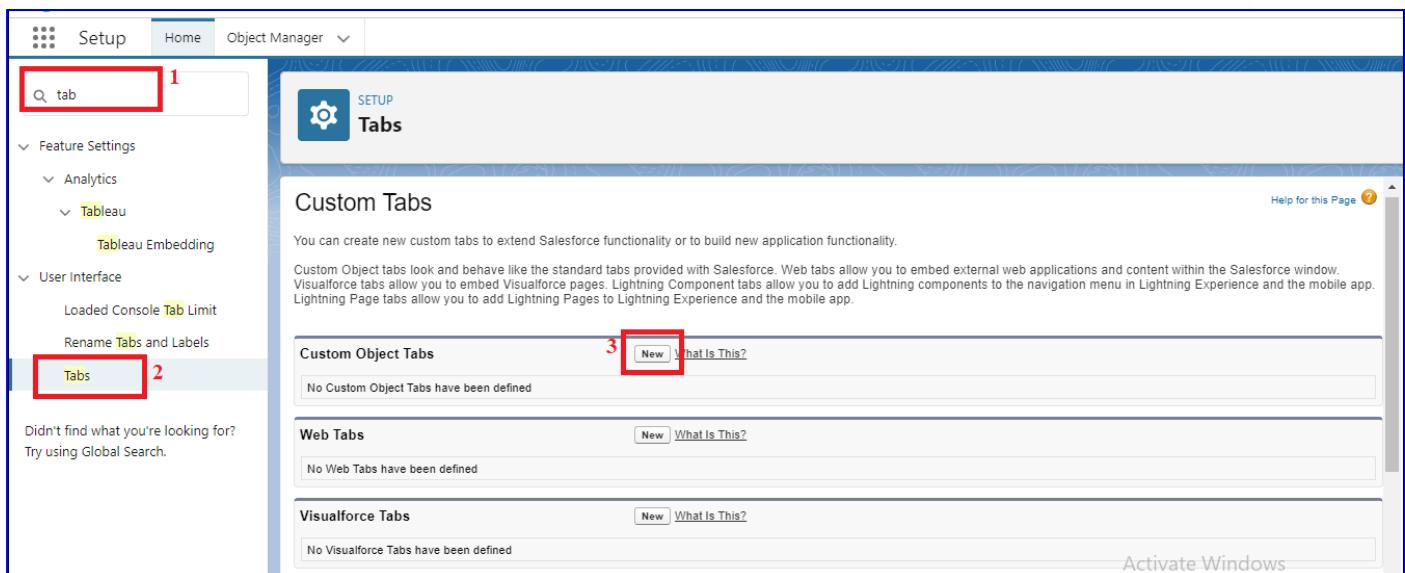

5. Click on Next >> (Add to profiles page) keep it as default >> Click on Next (Add to Custom App) uncheck the include tab .
6. Make sure that the Append tab to user's existing personal customizations is checked.

## MEDICAL INVENTORY MANAGEMENT

7. Click save.

### Activity 2: Creating a tab for Purchase Order Object

1. Go to the setup page >> type Tabs in Quick Find bar
2. Click on tabs
3. Click on New (under custom object tab).

4. Select Object(Purchase Order) >> Select the tab style

| Custom Object Tab Information |                       |
|-------------------------------|-----------------------|
| Tab Label                     | Purchase Orders       |
| Object                        | <u>Purchase Order</u> |
| Tab Style                     | Laptop                |

5. Click on Next >> (Add to profiles page) keep it as default >> Click on Next (Add to Custom App) uncheck the include tab .
6. Make sure that the Append tab to user's existing personal customizations is checked.
7. Click save.

### Activity 3: Creating a tab for Order Item Object

1. Go to the setup page >> type Tabs in Quick Find bar
2. Click on tabs
3. Click on New (under custom object tab).

# MEDICAL INVENTORY MANAGEMENT

## Milestone-4

### The Lightning app creation

#### Activity 1: Create a Lightning App for Medical Inventory Management

1. From Setup, enter App Manager in the Quick Find and select App Manager.
2. Click New Lightning App.

3. Enter Medical Inventory Management as the App Name >> Click on upload image and add an image related to Medical Inventory then click next

A screenshot of the 'New Lightning App' configuration page. The title 'New Lightning App' is at the top. Below it is a section titled 'App Details & Branding' with the sub-instruction 'Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.' The 'App Details' section contains fields for 'App Name' (Medical Inventory Management), 'Developer Name' (Medical\_Inventory\_Management), and 'Description' (Enter a description...). The 'App Branding' section contains fields for 'Image' (a placeholder box showing a blue cross icon) and 'Primary Color Hex' (#0070D2). There is also an 'Org Theme Options' checkbox. At the bottom, there is a progress bar with five steps and a 'Next' button on the right.

4. Under App Options, leave the default selections and click next.
5. Under Utility Items, leave as is and click Next.

## MEDICAL INVENTORY MANAGEMENT

6. From Available Items, select Products, Purchase Orders, Order Items, Inventory Transactions, Suppliers, Reports, and Dashboards and move them to Selected Item and Click Next.

Navigation Items

Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the items that you add. Some navigation items are available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.

| Available Items | Selected Items         |
|-----------------|------------------------|
| Dash            | Products               |
| Dashboards      | Purchase Orders        |
|                 | Order Items            |
|                 | Inventory Transactions |
|                 | Suppliers              |
|                 | Reports                |

7. From Available Profiles, select System Administrator and move it to Selected Profiles.

New Lightning App

User Profiles

Choose the user profiles that can access this app.

| Available Profiles   | Selected Profiles |
|----------------------|-------------------|
| system               |                   |

## Milestone-5

### Fields creation

#### Creating Fields in Product Object:

| Object  | Field Name           | Data Type       |
|---------|----------------------|-----------------|
| Product | Product ID(Standard) | Text            |
|         | Product Name         | Text            |
|         | Product Description  | Text Area       |
|         | Minimum Stock Level  | Number(18, 0)   |
|         | Current Stock Level  | Number(18, 0)   |
|         | Unit Price           | Currency(16, 2) |
|         | Expiry Date          | Date            |

#### Activity 1: Creating a Text Field in Product Object

To create fields in an object:

1. Click the gear icon and select Setup. This launches Setup in a new tab.
2. Click the Object Manager tab next to Home.
3. Select Product custom object.

The screenshot shows the Salesforce Object Manager interface. At the top, there's a navigation bar with 'Setup' and 'Object Manager' tabs. The 'Object Manager' tab is highlighted with a red box and has a red number '2' above it. Below the navigation is a search bar with 'Product' and a 'Create' button. The main area is titled 'Object Manager' and shows a table of objects. The table has columns: LABEL, API NAME, TYPE, DESCRIPTION, LAST MODIFIED, and DEPLOYED. A red box highlights the 'Product' row in the table, which corresponds to the 'Product\_c' API name and is listed as a 'Custom Object'. The last modified date is 18/06/2024.

| LABEL                     | API NAME                 | TYPE            | DESCRIPTION | LAST MODIFIED | DEPLOYED |
|---------------------------|--------------------------|-----------------|-------------|---------------|----------|
| Fulfillment Order Product | FulfillmentOrderLineItem | Standard Object |             |               |          |
| Opportunity Product       | OpportunityLineItem      | Standard Object |             |               |          |
| Order Product             | OrderItem                | Standard Object |             |               |          |
| Product                   | Product_c                | Custom Object   |             | 18/06/2024    | ✓        |
| Product                   | Product2                 | Standard Object |             |               |          |
| Product Attribute         | ProductAttribute         | Standard Object |             |               |          |

4. Select Fields & Relationships from the left navigation
5. Click on New

**Fields & Relationships**

- External Lookup Relationship
- Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
- Checkbox
- Allows users to select a True (checked) or False (unchecked) value.
- Currency
- Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
- Date
- Allows users to enter a date or pick a date from a popup calendar.
- Date/Time
- Allows users to enter date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.
- Email
- Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
- Geolocation
- Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
- Number
- Allows users to enter any number. Leading zeros are removed.
- Percent
- Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.
- Phone
- Allows users to enter any phone number. Automatically formats it as a phone number.
- Picklist
- Allows users to select a value from a list you define.
- Picklist (Multi-Select)
- Allows users to select multiple values from a list you define.
- Text
- Allows users to enter any combination of letters and numbers.

### **Activity 1 : Creating Lookup Relationship in Purchase Order Object**

A Lookup relationship is a type of relationship in Salesforce that connects two objects together based on a field known as the Lookup field. It establishes a relationship between a child object and a parent object, allowing the child object to reference the parent object.

To Create a relationship from Purchase Order to Supplier .

1. Go to the Setup page >> click on Object manager >> type object name(Purchase Order) in the quick find bar >> click on the Purchase Order object.
2. Click on Fields & Relationship
3. Click on New.
4. Select "Lookup relationship" as data type and click Next.

# MEDICAL INVENTORY MANAGEMENT

Specify the type of information that the custom field will contain.

**Data Type**

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary ⓘ A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

**Lookup Relationship** 4 Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

On the left, a sidebar lists various customization options: Details, Fields & Relationships (which is selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, and Record Types. The main area is titled 'New Custom Field' and 'Step 2. Enter the details'. It includes fields for 'Field Label' (Quantity Ordered), 'Length' (18), 'Decimal Places' (0), 'Field Name' (Quantity\_Ordered), and a 'Description' field. A note at the top right says: 'Please enter the length of the number and the number of decimal places. For example, a number with a length of 8 and 2 decimal places can accept values up to "12345678.90".' Navigation buttons at the bottom right include 'Previous', 'Next', and 'Cancel'.

7. Click on Next, Next and Save.

### Activity 4: Creating a Number Field in Order Item object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Order Item) in quick find box >> click on the Order Item custom object.
2. Now click on "Fields & Relationships"
3. Click on New.
4. Select Data type as "Number" and click Next.
5. Enter Field Label as "Quantity Received".
6. Length - 18, Decimal Places - 0.

## Activity 5: Creating a Unit Price Formula Field in Order Item object

To create fields in an object:

- Go to setup >> click on Object Manager >> type object name(Order Item) in quick find box >> click on the Order Item object.
- Now click on “Fields & Relationships”
- Click on New.
- Select Data type as “Formula” and click Next.
- Enter field label Unit Price.
- Select formula return type Currency, Click Next

Step 2. Choose output type

Step 2 of 5

Field Label: Unit Price 5

Field Name: Unit\_Price 6

Auto add to custom report type  Add this field to existing custom report types that contain this entity i

**Formula Return Type**

None Selected Select one of the data types below.

Checkbox Calculate a boolean value  
Example: `TODAY() > CloseDate`

Currency 6 Calculate a dollar or other currency amount and automatically format the field as a currency amount.  
Example: `Gross Margin = Amount - Cost_c`

Date Calculate a date, for example, by adding or subtracting days to other dates.  
Example: `Reminder Date = CloseDate - 7`

Date/Time Calculate a date/time, for example, by adding a number of hours or days to another date/time.  
Example: `Next = NOW() + 1`

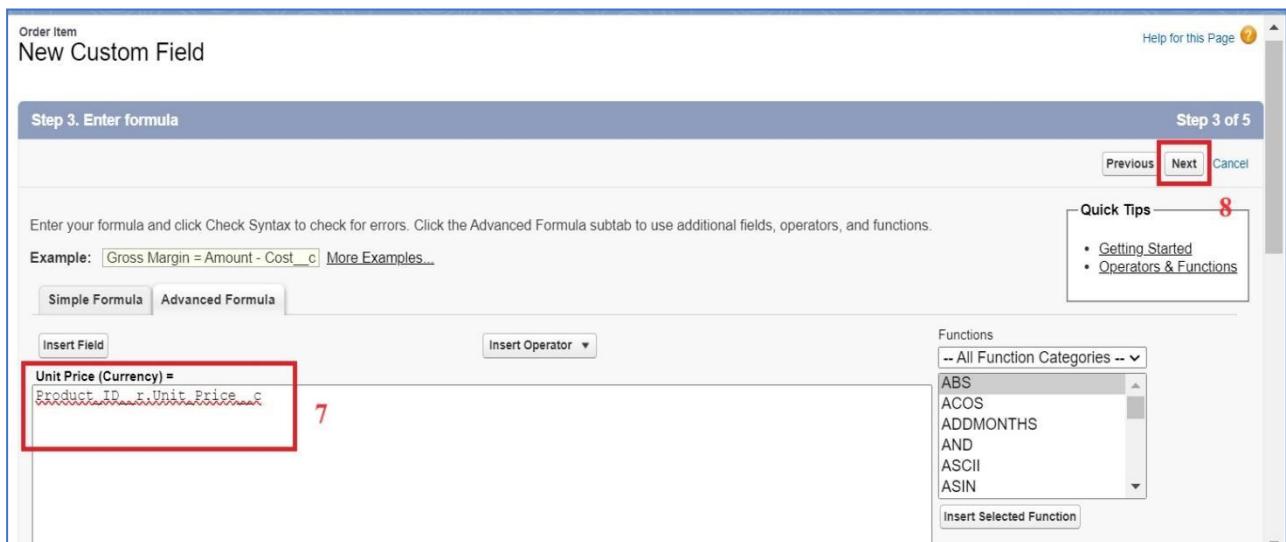

Number Calculate a numeric value.  
Example: `Fahrenheit = 1.8 * Celsius_c + 32`

Percent Calculate a percent and automatically add the percent sign to the number

|                       | Transaction Date         | Date                   |
|                       | Transaction Type         | Picklist               |
|                       | Total Order Cost         | Formula(Currency)      |

### Activity 1 : Creating Lookup Relationship in Inventory Management Object

A Lookup relationship is a type of relationship in Salesforce that connects two objects together based on a field known as the Lookup field. It establishes a relationship between a child object and a parent object, allowing the child object to reference the parent object.

To Create a relationship from Inventory Management to Purchase Order .

1. Go to the Setup page >> click on Object manager >> type object name (Inventory Management ) in the quick find bar >> click on the Inventory Management object.
2. Click on Fields & Relationship
3. Click on New.
4. Select “Lookup relationship” as data type and click Next.

Specify the type of information that the custom field will contain.

**Data Type**

None Selected      Select one of the data types below.

Auto Number      A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula      A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary      A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

**Lookup Relationship**      Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship      Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:
 

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

 The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

External Lookup Relationship      Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

5. Select the related object “ Purchase Order”.

## MEDICAL INVENTORY MANAGEMENT

6. Click on Next.
7. Give Field Label as "Purchase Order ID".
8. Select Required Field.

The screenshot shows the Salesforce Object Manager interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The main title is 'Inventory Transaction'. On the left, a sidebar lists options like 'Details', 'Fields & Relationships' (which is selected), 'Page Layouts', 'Lightning Record Pages', 'Buttons, Links, and Actions', 'Compact Layouts', 'Field Sets', 'Object Limits', and 'Record Types'. The main content area is titled 'Inventory Transaction New Relationship'. It's 'Step 3 of 6' with 'Help for this Page' and 'Previous', 'Next', 'Cancel' buttons. The form fields are: 'Field Label' (Purchase Order ID), 'Field Name' (Purchase\_Order\_ID), 'Description' (empty), and 'Help Text' (empty).

9. Click Next, Next, then Save.

### Activity 2: Creating a Date Field in Inventory Transaction object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Inventory Transaction) in quick find box >> click on the Inventory Management object.
2. Now click on "Fields & Relationships"
3. Click on New.
4. Select Data type as "Date" and click Next.
5. Enter field label Transaction Date

The screenshot shows the Salesforce Object Manager interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The main title is 'Inventory Transaction'. On the left, a sidebar lists options like 'Details', 'Fields & Relationships' (selected), 'Page Layouts', 'Lightning Record Pages', 'Buttons, Links, and Actions', 'Compact Layouts', 'Field Sets', 'Object Limits', 'Record Types', 'Related Lookup Filters', and 'Search Layouts'. The main content area is titled 'Inventory Transaction New Custom Field'. It's 'Step 2 of 4' with 'Help for this Page' and 'Previous', 'Next', 'Cancel' buttons. The form fields are: 'Field Label' (Transaction Date), 'Field Name' (Transaction\_Date), 'Description' (empty), and 'Help Text' (empty). At the bottom, there are checkboxes for 'Required' (unchecked), 'Auto add to custom report type' (unchecked), and 'Add this field to existing custom report types that contain this entity' (checked). There is also a 'Default Value' field with 'Show Formula Editor'.

6. Click Next, Next, then Save.

### Activity 3: Creating a Picklist Field in Inventory Transaction Object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Inventory Transaction) in quick find box>> click on the Inventory Transaction Object.
2. Now click on "Fields & Relationships" .
3. Click on New.
4. Select Data type as "Picklist" and click Next.
5. Enter Field Label as "Transaction Type".
6. In values select "Enter values, with each value separated by a new line" and enter values as shown below.
  - Receipt
  - Issue
  - Adjustment

The screenshot shows the 'Step 2. Enter the details' screen for creating a picklist field. The 'Field Label' is set to 'Transaction Type'. The 'Values' section is highlighted with a red box and contains three entries: 'Receipt', 'Issue', and 'Adjustment', each separated by a new line. The 'Values' section also includes options for 'Use global picklist value set' (unchecked), 'Display values alphabetically, not in the order entered' (unchecked), 'Use first value as default value' (unchecked), and 'Restrict picklist to the values defined in the value set' (checked). The 'Field Name' is 'Transaction\_Type' and the 'Description' is 'OneDrive - Personal Online'. The 'Next' button is highlighted with a red box.

7. Click Next, Next, then Save.

### Activity 4: Creating a Total Order Cost Formula Field in Inventory Transaction object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Inventory Transaction) in quick find box >> click on the Order Item object.
2. Now click on "Fields & Relationships"
3. Click on New.
4. Select Data type as "Formula" and click Next.
5. Enter field label Total Order Cost.
6. Select formula return type Currency, Click Next

## MEDICAL INVENTORY MANAGEMENT

7. Create and insert Advance formula: Purchase\_Order\_ID\_\_r.Total\_Order\_Cost\_\_c

The screenshot shows a formula editor interface. At the top, there are two tabs: "Simple Formula" and "Advanced Formula", with "Advanced Formula" being the active tab. Below the tabs are two buttons: "Insert Field" and "Insert Operator". The main area contains the formula "Purchase\_Order\_ID\_\_r.Total\_Order\_Cost\_\_c" which is highlighted with a red underline.

8. Click Next, Next, then Save.

### Creating fields for Supplier object

| Supplier | Supplier ID(Standard) | Text     |
|----------|-----------------------|----------|
|          | Supplier Name         | Text     |
|          | Contact Person        | Text     |
|          | Phone Number          | Phone    |
|          | Email                 | Email    |
|          | Address               | TextArea |

### Activity 1: Creating a Text Field in Supplier object

To create fields in an object:

1. Click the gear icon and select Setup. This launches Setup in a new tab.
2. Click the Object Manager tab next to Home.
3. Select Supplier custom object.
4. Select Fields & Relationships from the left navigation
5. Click on New
6. Select Text field, click Next

The screenshot shows a "New Field" creation dialog. On the left, there is a list of field types with radio buttons: "Picklist (Multi-Select)", "Text" (which is selected and highlighted with a red box), "Text Area", "Text Area (Long)", "Text Area (Rich)", "Text (Encrypted)", "Time", and "URL". To the right of the list, there are descriptions for each type. At the bottom right of the dialog, there are "Next" and "Cancel" buttons, with "Next" also highlighted with a red box.

Purchase Order Validation Rule Help for this Page 

Define a validation rule by specifying an error condition and a corresponding error message. The error condition is written as a Boolean formula expression that returns true or false. When the formula expression returns true, the save will be aborted and the error message will be displayed. The user can correct the error and try again.

**Validation Rule Edit** Save Save & New Cancel

Rule Name: **Expected\_Delivery\_Date\_Validation** 3

Active:  4

Description:

Error Condition Formula

Example: **Discount\_Percent\_\_c>0.30** [More Examples...](#)

Display an error if Discount is more than 30%

If this formula expression is **true**, display the text defined in the Error Message area

**Functions**

# MEDICAL INVENTORY MANAGEMENT

## Milestone-9

### Profiles Creation

#### Activity 1: To create an Inventory Manager Profile

1. Go to setup >> type profiles in quick find box >> click on profiles >> clone the desired profile (Standard User) >> enter profile name (**Inventory Manager**) >> Save.

The screenshot shows the Salesforce Setup interface under the Profiles section. A list of profiles is displayed, with the 'Standard User' profile selected and its edit/clone link highlighted by a red box. Other profiles shown include Salesforce API Only System Integrations, Silver Partner User, Solution Manager, Standard Platform User, and System Administrator.

#### Clone Profile

Enter the name of the new profile.

You must select an existing profile to clone from.

Existing Profile    Standard User

User License    Salesforce

Profile Name

2. While still on the profile page, then click Edit.

## MEDICAL INVENTORY MANAGEMENT

- Select the Custom App settings as default for the Medical Inventory Management.

The screenshot shows the 'Profiles' section under 'SETUP'. It lists various standard and custom apps with checkboxes for 'Visible' and 'Default'. The 'Medical Inventory Management' app is highlighted with a red border and has its 'Default' checkbox checked.

| App   | Visible                             | Default                          |
|---|-------------------------------------|----------------------------------|
| All Tabs (standard__AllTabSet)                              | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Analytics Studio (standard__Insights)                       | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| App Launcher (standard__AppLauncher)                        | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Bolt Solutions (standard__lightningBolt)                    | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Community (standard__Community)                             | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Content (standard__Content)                                 | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Data Manager (standard__DataManager)                        | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Digital Experiences (standard__SalesConsole)                | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Lightning User App (standard__LightningInstrumentation)     | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Marketing CRM Class (standard__Marketing)                   | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Medical Inventory Management (Medical_Inventory_Management) | <input type="checkbox"/>            | <input checked="" type="radio"/> |
| Queue Management (standard__QueueManagement)                | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Sales (standard__Lightning_Sales)                           | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Sales Console (standard__LightningSalesConsole)             | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Salesforce Chatter (standard__Chatter)                      | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Salesforce Scheduler Setup (standard__LightningScheduler)   | <input type="checkbox"/>            | <input type="radio"/>            |
| Sample Console (standard__ServiceConsole)                   | <input type="checkbox"/>            | <input type="radio"/>            |
| Service (standard__Service)                                 | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Service Console (standard__LightningService)                | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Site.com (standard__Sites)                                  | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| Subscription Management (standard__RevenueCloudConsole)     | <input checked="" type="checkbox"/> | <input type="radio"/>            |
| WDC (standard__Work)  | <input checked="" type="checkbox"/> | <input type="radio"/>            |

- Scroll down to Custom Object Permissions and Give access permissions as mentioned in the below diagram.

The screenshot shows the 'Custom Object Permissions' section. It lists several objects with checkboxes for basic access (Read, Create, Edit, Delete) and data administration (View All, Modify All). The 'Products' object and the 'Purchase Orders' object are highlighted with red boxes around their respective permission grids.

| Object                 | Basic Access                        |                                     |                                     |                                     | Data Administration                 |                                     |
|------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|
|                        | Read                                | Create                              | Edit                                | Delete                              | View All                            | Modify All                          |
| Inventory Transactions | <input checked="" type="checkbox"/> |
| Order Items            | <input checked="" type="checkbox"/> |
| Products               | <input checked="" type="checkbox"/> |
| Purchase Orders        | <input checked="" type="checkbox"/> |
| Suppliers              | <input checked="" type="checkbox"/> |

- Change the password policies as mentioned :
- User passwords expire in should be " never expires ".
- Minimum password length should be " 8 ", and click save.

The screenshot shows the 'Password Policies' section. It includes fields for password expiration (set to 'Never expires'), history (3 passwords remembered), length (8 characters), complexity (must include alpha and numeric characters), and other security settings like lockout periods and obscure answers. The 'Save' button is highlighted with a red border.

|  |   |
|--|---|
| User passwords expire in                                 | Never expires                             |
| Enforce password history                                 | 3 passwords remembered                    |
| Minimum password length                                  | 8   |
| Password complexity requirement                          | Must include alpha and numeric characters |
| Password question requirement                            | Cannot contain password                   |
| Maximum invalid login attempts                           | 10  |
| Lockout effective period                                 | 15 minutes                                |
| Obscure secret answer for password resets                | <input type="checkbox"/>                  |
| Require a minimum 1 day password lifetime                | <input type="checkbox"/>                  |
| Don't immediately expire links in forgot password emails | <input type="checkbox"/>                  |

### Activity 2: To create an Purchase Manager Profile

- Go to setup >> type profiles in quick find box >> click on profiles >> clone the desired profile (Standard User) >> enter profile name (**Purchase Manager**) >> Save.
- While still on the profile page, then click Edit.
- Select the Custom App settings as default for the Medical Inventory Management.

**Buttons:** Save (highlighted with a red box), Save & New, Cancel

# MEDICAL INVENTORY MANAGEMENT

## Milestone-10

### Roles Creation

#### Activity 1 : Create a Purchasing Manager Role.

1. Go to quick find >> Search for Roles >> click on Set Up Roles.

The screenshot shows the Salesforce Setup - Roles page. The left sidebar has a search bar for 'roles' and a 'Roles' section under 'Sales'. The main area displays a 'Role Hierarchy' diagram. At the top level is 'Executive Staff' with 'CEO, President' and 'CFO, VP, Sales'. Below them are 'Western Sales Director' and 'Eastern Sales Director'. These two directors have 'International Sales Director' as their manager. The 'International Sales Director' oversees 'Western Sales Rep', 'Eastern Sales Rep', 'Asia Sales Rep', and 'European Sales Rep'. A note next to the hierarchy states: '\* View & edit data, roll up forecasts, & generate reports for all users below this level. \* Can't access data of other levels or other Executive Staff'. At the bottom left, there's a note: 'Didn't find what you're looking for? Try using Global Search.' On the right, there are 'Set Up Roles' and 'Don't show this page again' buttons.

2. Click on Expand All and click on add role under SVP, Sales & Marketing role.
3. Give Label as "**Purchasing Manager**" and Role name gets auto populated. Then click on Save.

The screenshot shows the Salesforce Role Edit - New Role page. The 'Role Edit' section contains fields for 'Label' (Purchasing Manager), 'Role Name' (Purchasing\_Manager), and 'This role reports to' (SVP, Sales & Marketing). The 'Role Name as displayed on reports' field is empty. At the bottom are 'Save', 'Save & New', and 'Cancel' buttons. The 'Role Name' and 'This role reports to' fields are highlighted with a red border.

#### Activity 2 : Create a Purchasing Manager Role.

1. Go to quick find >> Search for Roles >> click on Set Up Roles.

# MEDICAL INVENTORY MANAGEMENT

The screenshot shows the Salesforce Setup Roles page. On the left, there's a sidebar with a search bar and sections for Users, Feature Settings, Sales, Service, and Case Teams. The 'Roles' section is highlighted with a red box. The main area displays a 'Sample Role Hierarchy' titled 'Territory-based Sample'. It shows a hierarchy from 'Executive Staff' down to 'Western Sales Rep' and 'Eastern Sales Rep'. A callout box provides details about the 'Territory-based Sample' hierarchy. At the bottom right of the main area is a 'Set Up Roles' button.

2. Click on Expand All and click on add role under SVP, Sales & Marketing role.
3. Give Label as "**Inventory Manager**" and the Role name gets auto populated. Then click on Save.

The screenshot shows the Salesforce Role Edit page for creating a new role. The title is 'Role Edit' and the sub-section is 'New Role'. The 'Role Edit' form has three fields highlighted with a red box: 'Label' (set to 'Inventory Manager'), 'Role Name' (auto-populated as 'Inventory\_Manager'), and 'This role reports to' (set to 'SVP, Sales & Marketing'). Below the form is a field for 'Role Name as displayed on reports'. At the bottom right are 'Save', 'Save & New', and 'Cancel' buttons, with 'Save' highlighted with a red box.

# MEDICAL INVENTORY MANAGEMENT

## Milestone-11

### Users Creation

#### Activity 1 : Create a Purchasing Manager User.

1. Go to setup >> type users in quick find box >> Select Users >> click on New User.

The screenshot shows the Salesforce Setup interface. On the left, the navigation sidebar is open, showing various categories like Permission Set Groups, Profiles, Public Groups, Queues, Roles, and User Management Settings. Under User Management Settings, the 'Users' option is selected and highlighted with a red box, labeled '2'. In the center, the 'Users' page is displayed with the title 'All Users'. A sub-header says 'On this page you can create, view, and manage users.' Below it, there's a note about downloading the Salesforce mobile app for iOS and Android. A 'View' dropdown is set to 'All Users'. At the top right of the main area, there are buttons for 'New User' (highlighted with a red box, labeled '3'), 'Reset Password(s)', and 'Add Multiple Users'. The main table lists existing users with columns for Action, Full Name, Alias, Username, Role, Active, and Profile. The table data is as follows:

| Action                        | Full Name            | Alias   | Username   | Role                 | Active                              | Profile         |
|-------------------------------|----------------------|---------|--|----------------------|-------------------------------------|-----------------|
| <input type="checkbox"/> Edit | 1_User               | u1      | utkarsh2@vanshiv.com   | Operator_1           | <input checked="" type="checkbox"/> | operator        |
| <input type="checkbox"/> Edit | 2_User               | u2      | utkarsh3@vanshiv.com   | Operator_2           | <input checked="" type="checkbox"/> | operator        |
| <input type="checkbox"/> Edit | Chatter Expert       | Chatter | chatty.00d2w00000rs8akeai.murokjifrf1@chatter.salesforce.com | Chatter Free User    | <input checked="" type="checkbox"/> |                 |
| <input type="checkbox"/> Edit | Technologies_vanshiv | VTech   | vehicledemo@vanshiv.com                                      | System Administrator | <input checked="" type="checkbox"/> |                 |
| <input type="checkbox"/> Edit | Teddy John           | ted     | utkarsh1@vanshiv.com   | Vehicle Manager      | <input checked="" type="checkbox"/> | Vehicle Manager |

2. Enter the First Name- John, Last Name- PuchaseM and (Your) email address and a unique username in the form of an email address. By default, the username is the same as the email address.
3. Select Role as Purchasing Manager.
4. Select a User License as salesforce.
5. NOTE- As Salesforce license can only be used by 2 Users at a time in Dev Org, So If you don't find a salesforce license then deactivate a user who has a salesforce license or change the license type from Salesforce to any other.
6. Select a profile as Purchase Manager.
7. Check Generate new password and notify the user immediately to have the user's login name and a temporary password emailed to your email.
8. Click on Save.

3 New User | Reset Password(s) | Add Multiple Users

2. Enter the First Name- Ram, Last Name- Krishna and (Your) email address and a unique username in the form of an email address. By default, the username is the same as the email address.
3. Select Role as Inventory Manager.
4. Select a User License as salesforce.

## **MEDICAL INVENTORY MANAGEMENT**

5. NOTE- As Salesforce license can only be used by 2 Users at a time in Dev Org, So If you don't find a salesforce license then deactivate a user who has a salesforce license or change the license type from Salesforce to any other.
6. Select a profile as Inventory Manager.
7. Check Generate new password and notify the user immediately to have the user's login name and a temporary password emailed to your email.
8. Click on Save.

# MEDICAL INVENTORY MANAGEMENT

## Milestone-12

### Permission Sets Creation

#### Activity 1 : Create a Permission Set.

1. Go to setup >> type Permission in quick find box >> Select Permission Set >> click on New.

The screenshot shows the Salesforce Setup interface under the 'Permission Sets' section. On the left, there's a sidebar with 'Permission' selected. The main area displays a table of 'Permission Sets' with columns for Action, Permission Set Label, Description, and License. A red box highlights the 'New' button at the top left of the table. The table lists various permission sets like 'Buyer', 'CRM User', and 'Service Cloud Voice User'.

2. Enter Label as **Purchase Manager Create Access** >> Click on Save.

The screenshot shows the 'Permission Set Create' page. It has fields for 'Label' (set to 'Purchase Manager Create Access') and 'API Name' (set to 'Purchase\_Manager'). The 'Save' button is highlighted with a red box. Other fields include 'Description' and 'Session Activation Required'.

3. From Object Settings >> Select Order Item >> Enable for both Tab Available and Visible >>
4. Enable Read and Create in Object Permissions >> Click on Save.

The screenshot shows the 'Purchase Manager Create Access' object settings page. It has tabs for 'Find Settings...', 'Clone', 'Delete', 'Edit Properties', 'Manage Assignments', and 'View Summary'. The 'Order Items' tab is selected. Under 'Order Items', there are 'Tab Settings' and 'Object Permissions' sections. In 'Tab Settings', 'Available' and 'Visible' checkboxes are checked. In 'Object Permissions', 'Read' and 'Create' checkboxes are checked. The 'Save' button is highlighted with a red box.

## MEDICAL INVENTORY MANAGEMENT

5. Navigate to the Permission Set detail page >> Click Manage Assignments >> Click Add Assignments >> Select the user John PurchaseM to assign the permission set to and click Next.

The screenshot shows the 'Purchase Manager Create Access' assignment screen. It lists users assigned to the permission set, with one user, 'John PurchaseM', selected and highlighted with a red box. The 'Next' button at the bottom right is also highlighted with a red box.

## Milestone-13

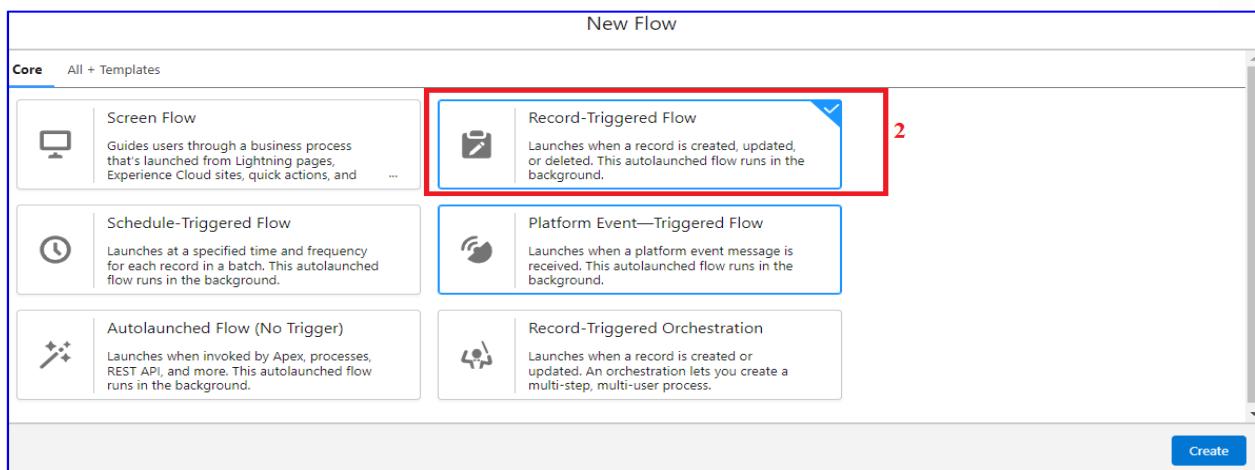

### Flows Creation

#### Activity 1 : Create Flow to update the Actual Delivery Date.

1. Go to setup >> type Flow in quick find box >> Click on the Flow and Select the New Flow >> Start From Scratch .

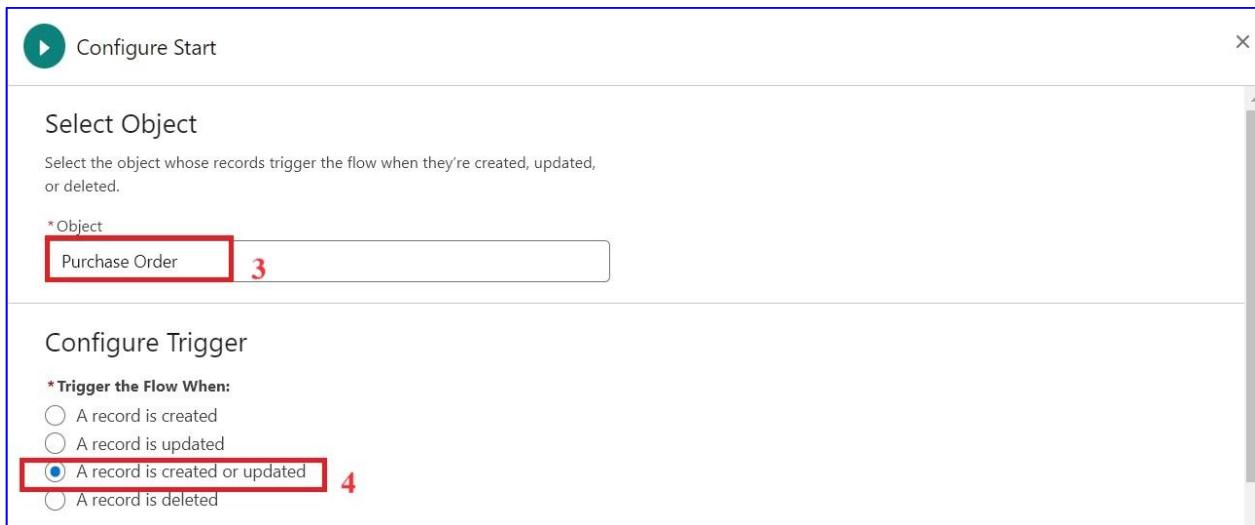

2. Select the record Triggered flow.Click on create.

3. Under Object select “Purchase Order”

4. Select A record is created or updated

## MEDICAL INVENTORY MANAGEMENT

5. Set Entry Conditions : None
6. Select Fast Field Updates and click on Done

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements

None 5

\*Optimize the Flow for:

**Fast Field Updates**  
Update fields on the record that triggers the flow to run. This high-performance flow runs *before* the record is saved to the database.

**Actions and Related Records**  
Update any record and perform actions, like send an email. This more flexible flow runs *after* the record is saved to the database.

Include a Run Asynchronously path to access an external system after the original transaction for the triggering record is successfully committed

7. Under the record trigger flow click on the "+" icon and select Get Records.
8. Enter Label as "**Get Purchase Record**".
9. For Object select Purchase Order.
10. For Condition Requirements , select All Conditions are Met(AND)
11. For the first condition select as follows:

Field: Id

Operator: Equals

Value: {\$Record.Id}

Get Records

\* Label **Get Purchase Record** 8

\* API Name **Get\_Purchase\_Record**

Description

Get Records of This Object

\* Object **Purchase Order** 9

Filter Purchase Order Records 10

Condition Requirements

All Conditions Are Met (AND)

Field **Id** Operator **Equals** Value **Aa \$Record > Record ID**

+ Add Condition

12. For How many Records to store Select Only the First Record.

## MEDICAL INVENTORY MANAGEMENT

13. For How to Store Record Data select Choose fields and let Salesforce do the rest. Select Field: Order\_Date\_c. Click on Done.

How Many Records to Store

Only the first record

All records

How to Store Record Data

Automatically store all fields

Choose fields and let Salesforce do the rest

Choose fields and assign variables (advanced)

Select Purchase Order Fields to Store in Variable

| Field        |
|--------------|
| ID           |
| Order_Date_c |

+ Add Field

14. In the Flow Builder, click on the Manager tab on the left-hand side >> Click on New Resource >> In the Resource Type dropdown, select Variable.
15. Enter API name as ActualDeliveryDate >> Select Data type as Date >> Click on Done.
16. From the Toolbox drag and drop Assignment element.
17. Enter the label as "Assignment".
18. Set Variable Values:

a) Variable : {!ActualDeliveryDate}

Operator : Equals

Value : {!\$Record.Order\_Date\_c}

b) Variable : {!ActualDeliveryDate}

Operator : Add

Value : 3

## MEDICAL INVENTORY MANAGEMENT

Assignment

| <div style="height: 100px; border: 1px solid #ccc; margin-top: 10px;"></div>                            |   |   |
| <b>Set Variable Values</b>  |   |   |
| Each variable is modified by the operator and value combination.  |   |   |
| Variable  | Operator  | Value   |
| <span style="font-size: 2em;">CALENDAR</span> ActualDeliveryDate <span style="color: #0070C0;">X</span> | Equals <span style="color: #0070C0;">▼</span>     | <span style="font-size: 2em;">CALENDAR</span> \$Record > Order Date <span style="color: #0070C0;">X</span> <span style="color: #0070C0;">i</span> |
| Variable  | Operator  | Value   |
| <span style="font-size: 2em;">CALENDAR</span> ActualDeliveryDate <span style="color: #0070C0;">X</span> | Add <span style="color: #0070C0;">▼</span>        | 3 <span style="color: #0070C0;">i</span>  |
| <span style="color: #0070C0;">+</span> Add Assignment   |   |   |

19. Click Done
20. From the Toolbox drag and drop Update Records element and connect to the Assignment element.
21. Enter the label as "Updating Purchasing Order".
22. How to Find Records to Update and Set Their Values : Use the Purchase Order record that triggered the flow
23. Set Filter Conditions : None -Always Update Record
24. Set Field Values for the Trip Record as  
Field : Actual\_Delivery\_Date\_\_c  
Value : {!ActualDeliveryDate}

# MEDICAL INVENTORY MANAGEMENT

Update Records

\* How to Find Records to Update and Set Their Values

- Use the purchase order record that triggered the flow
- Update records related to the purchase order record that triggered the flow
- Use the IDs and all field values from a record or record collection
- Specify conditions to identify records, and set fields individually

Because this flow runs *before* a record is saved, you can only update the record that triggered the flow to run. To update other records, configure the trigger to run the flow *after* the record is saved.

Set Filter Conditions

Condition Requirements to Update Record

None—Always Update Record

Set Field Values for the Purchase Order Record

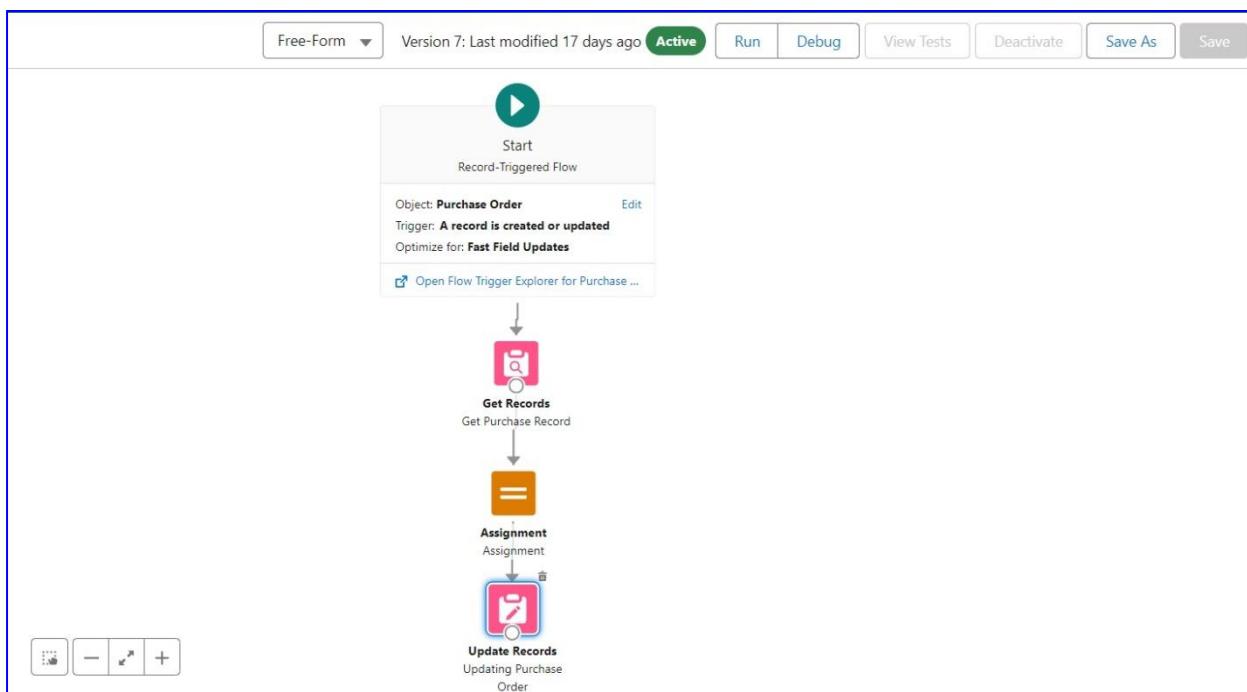

| Field                  | Value              |
|------------------------|--------------------|
| Actual_Delivery_Date_c | ActualDeliveryDate |

+ Add Field

25. Click Done

26. Save the flow as "Actual Delivery Date Updating".

27. Activate the flow.

## MEDICAL INVENTORY MANAGEMENT

### Milestone-14

#### **Activity 1 : Create a Trigger to Calculate total amount on Order Item.**

##### **Step 1 :** Login to Salesforce:

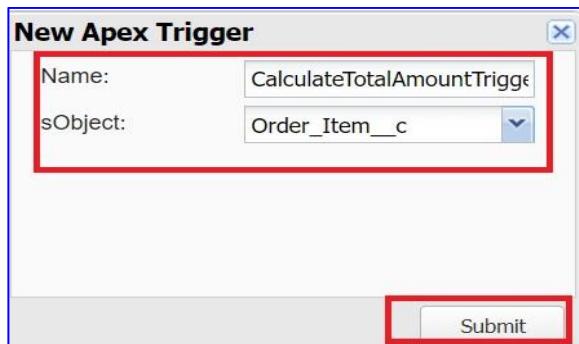

Log in to your Salesforce account with administrative privileges.

##### **Step 2:**

- i. Navigate to Setup: Once logged in, click on the gear icon ?? (Setup) located at the top-right corner of the page. This will open the Setup menu.
- ii. Click on Developer Console: Click on the "Developer Console" option from the Setup menu. This will open the Developer Console in a new browser tab or window.

##### **Step 3:**

- i. In the Developer Console window, go to the top menu and click on "File".
- ii. Select New: From the dropdown menu under "File", select "New".
- iii. Choose Apex Trigger: This will open a new Apex Trigger editor tab.

##### **Create an Apex Trigger:**

```
trigger CalculateTotalAmountTrigger on Order_Item__c (after insert, after update, after delete, after undelete) {  
    // Call the handler class to handle the logic  
    CalculateTotalAmountHandler.calculateTotal(Trigger.new, Trigger.old,  
    Trigger.isInsert, Trigger.isUpdate, Trigger.isDelete, Trigger.isUndelete);  
}
```

##### **Step 4:**

- i. In the Developer Console window, go to the top menu and click on "File".
- ii. Select New: From the dropdown menu under "File", select "New".
- iii. Choose Apex Class: Name it as CalculateTotalAmountHandler

## MEDICAL INVENTORY MANAGEMENT

```
public class CalculateTotalAmountHandler {  
    // Method to calculate the total amount for Purchase Orders based on related Order Items  
    public static void calculateTotal(List<Order_Item__c> newItems, List<Order_Item__c>  
        oldItems, Boolean isInsert, Boolean isUpdate, Boolean isDelete, Boolean isUndelete) {  
        // Collect Purchase Order IDs affected by changes in Order_Item__c records  
        Set<Id> parentIds = new Set<Id>();  
        // For insert, update, and undelete scenarios  
        if (isInsert || isUpdate || isUndelete) {  
            for (Order_Item__c ordItem : newItems) {  
                parentIds.add(ordItem.Purchase_Order_Id__c);  
            }  
        }  
        // For update and delete scenarios  
        if (isUpdate || isDelete) {  
            for (Order_Item__c ordItem : oldItems) {  
                parentIds.add(ordItem.Purchase_Order_Id__c);  
            }  
        }  
        // Calculate the total amounts for affected Purchase Orders  
        Map<Id, Decimal> purchaseToUpdateMap = new Map<Id, Decimal>();  
        if (!parentIds.isEmpty()) {  
            // Perform an aggregate query to sum the Amount__c for each Purchase Order  
            List<AggregateResult> aggrList = [  
                SELECT Purchase_Order_Id__c, SUM(Amount__c) totalAmount  
                FROM Order_Item__c  
                WHERE Purchase_Order_Id__c IN :parentIds  
                GROUP BY Purchase_Order_Id__c  
            ];  
            // Map the result to Purchase Order IDs  
            for (AggregateResult aggr : aggrList) {  
                Id purchaseOrderId = (Id)aggr.get('Purchase_Order_Id__c');  
                Decimal totalAmount = (Decimal)aggr.get('totalAmount');  
                purchaseToUpdateMap.put(purchaseOrderId, totalAmount);  
            }  
            // Prepare Purchase Order records for update  
            List<Purchase_Order__c> purchaseToUpdate = new List<Purchase_Order__c>();  
            for (Id purchaseOrderId : purchaseToUpdateMap.keySet()) {  
                Purchase_Order__c purchaseOrder = new Purchase_Order__c(Id = purchaseOrderId,  
                    Total_Order_cost__c = purchaseToUpdateMap.get(purchaseOrderId));  
            }  
        }  
    }  
}
```

## MEDICAL INVENTORY MANAGEMENT

```
    purchaseToUpdate.add(purchaseOrder);

}

// Update Purchase Orders if there are any changes
if (!purchaseToUpdate.isEmpty()) {
    update purchaseToUpdate;
}

}

}

}
```

**Save it.**

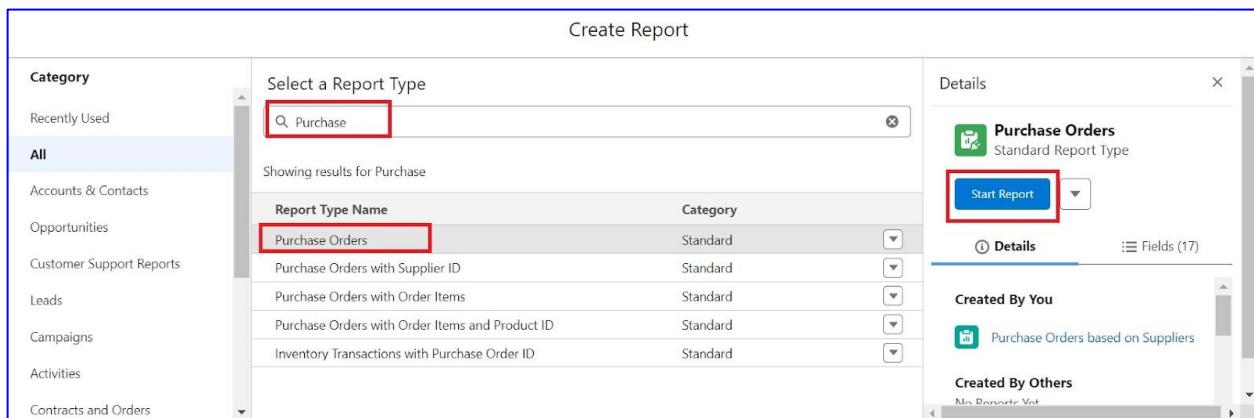

# MEDICAL INVENTORY MANAGEMENT

## Milestone-15

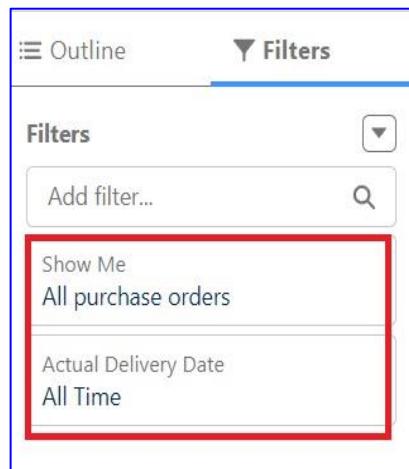

### Reports Creation

#### Activity 1: Create a Purchase Orders based on Suppliers (Summary) Report

1. Click App Launcher
2. Select Medical Inventory Management App
3. Click on Reports tab
4. Click on New Report.
5. Click the report type as **Purchase Orders** Click Start report.

6. Click on Filters and select as follows and click on Apply

7. Customize your report, in group rows select – Supplier ID, Purchase Order: Purchase Order ID, for columns Order Count, Total Order Cost (In this way we are making a Summary Report).
8. Click save and run
9. Give report name – Purchase Orders based on Suppliers.
10. Click Save

NOTE: In this report you can see your all record of the object you selected for reporting

# MEDICAL INVENTORY MANAGEMENT

(What you selects in "Select a report type option")

The screenshot shows the 'Purchase Orders based on Suppliers' report configuration. The 'Fields' panel on the left is expanded, showing 'GROUP ROWS' and 'GROUP COLUMNS'. The 'GROUP ROWS' section contains 'Supplier ID' and 'Purchase Order: Purchase Order ID'. The 'GROUP COLUMNS' section contains '# Order Count' and '# Total Order Cost'. The main preview area shows a table with columns: Supplier ID, Purchase Order: Purchase Order ID, Order Count, and Total Order Cost. The data includes records from Supplier-001 and Supplier-002, with a total of 14 orders costing ₹26,325.00. The top right of the preview area has a red box around the 'Save & Run' button and the 'Update Preview Automatically' checkbox, which is checked.

| Supplier ID      | Purchase Order: Purchase Order ID | Order Count | Total Order Cost |
|------------------|-----------------------------------|-------------|------------------|
| Supplier-001 (4) | Purchase-0001 (1)                 | 3           | ₹2,075.00        |
|                  | Purchase-0002 (1)                 | 2           | ₹3,250.00        |
|                  | Purchase-0003 (1)                 | 3           | ₹7,000.00        |
|                  | Purchase-0004 (1)                 | 4           | ₹9,500.00        |
| Supplier-002 (1) | Purchase-0005 (1)                 | 2           | ₹4,500.00        |
| Total (5)        |                                   | 14          | ₹26,325.00       |

## View Report

1. Click on App Launcher on the left side of the screen.
2. Search Medical Inventory Management App & click on it.
3. Click on Reports Tab.
4. Click on Purchase Orders based on Suppliers and see records.

The screenshot shows the generated 'Purchase Orders based on Suppliers' report. At the top, it displays summary statistics: Total Records (5), Total Order Count (14), and Total Total Order Cost (₹26,325.00). The main content is a table with columns: Supplier ID, Purchase Order: Purchase Order ID, Order Count, and Total Order Cost. The data matches the configuration in the previous screenshot, showing records for Supplier-001 and Supplier-002. The bottom of the screen has standard report navigation controls for Row Counts, Detail Rows, Subtotals, and Grand Total.

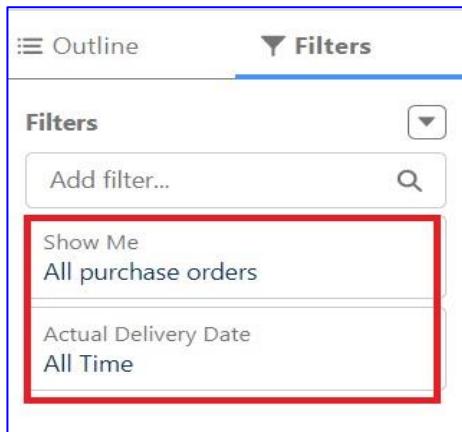

| Supplier ID      | Purchase Order: Purchase Order ID | Order Count | Total Order Cost |
|------------------|-----------------------------------|-------------|------------------|
| Supplier-001 (4) | Purchase-0001 (1)                 | 3           | ₹2,075.00        |
|                  | Purchase-0002 (1)                 | 2           | ₹3,250.00        |
|                  | Purchase-0003 (1)                 | 3           | ₹7,000.00        |
|                  | Purchase-0004 (1)                 | 4           | ₹9,500.00        |
| Supplier-002 (1) | Purchase-0005 (1)                 | 2           | ₹4,500.00        |
| Total (5)        |                                   | 14          | ₹26,325.00       |

## Activity 2: Create a Complete Purchase Details Report

1. Click App Launcher
2. Select Medical Inventory Management App
3. Click on Reports tab

## MEDICAL INVENTORY MANAGEMENT

4. Click on New Report.
5. Click the report type as Purchase Orders with Order Items and Product ID >> Click Start report.
6. Click on Filters and select as follows and click on Apply

7. Customize your report, in group rows select – Supplier ID, Actual Delivery Date, Purchase Order: Purchase Order ID, for columns Product ID : Product ID, Product ID : Product Name, Order Count, Quantity Received, Amount (In this way we are making a Summary Report).
8. Click save and run
9. Give report name – Complete Purchase Details Report
10. Click Save

| Supplier ID       | Actual Delivery Date | Purchase Order: Purchase Order ID | Product ID: Product ID | Order Count | Product ID: Product Name | Quantity Received | Amount     |

## Milestone-16

### Dashboards Creation

#### Activity 1: - Create Dashboard

1. Click on the Dashboards tab from the Medical Inventory Management application.
2. Click on the new dashboard.
3. Give name - **Medical Inventory DashBoard**
4. Click create
5. Click on +widget

6. Select the Purchase Orders based on Suppliers Report

Select Report

Reports

## MEDICAL INVENTORY MANAGEMENT

### Activity 2: View Dashboard

1. Click on App Launcher on the left side of the screen.
2. Search Medical Inventory Management & click on it.
3. Click on Dashboard Tab.
4. Click on **Medical Inventory DashBoard** see graph view of records

# MEDICAL INVENTORY MANAGEMENT

## OUTPUTS:

The screenshot shows the 'Products' tab in the 'Recently Viewed' section. It displays a list of three products: 'product-3', 'product-2', and 'Product - 1'. The interface includes a search bar, filter options, and a toolbar with buttons for 'New', 'Import', 'Change Owner', and 'Assign Label'.

| Product ID | Product Name |
|------------|--------------|
| 1          | product-3    |
| 2          | product-2    |
| 3          | Product - 1  |

## PRODUCTS TAB

The 'New Product' dialog box is open, showing fields for Product ID ('product-3'), Product Name ('cetirizine'), Product Description (empty), Unit Price (\$9.00), and Current Stock Level (empty). The dialog also includes a 'Minimum Stock Level' field and buttons for 'Cancel', 'Save & New', and 'Save'.

## NEW PRODUCT DETAILS

The screenshot shows the 'Purchase Orders' tab in the 'Recently Viewed' section. It displays a list of four purchase orders: 'P ORDER -04', 'P ORDER-01', 'P ORDER-02', and 'P ORDER - 03'. The interface includes a search bar, filter options, and a toolbar with buttons for 'New', 'Import', 'Change Owner', and 'Assign Label'.

| Purchase Order ID |              |
|-------------------|--------------|
| 1                 | P ORDER -04  |
| 2                 | P ORDER-01   |
| 3                 | P ORDER-02   |
| 4                 | P ORDER - 03 |

## PURCHASE ORDERS TAB

## MEDICAL INVENTORY MANAGEMENT

The screenshot shows a modal window titled "New Purchase Order". At the top right is a search bar with placeholder text "Search..." and a close button (X). Below the title is a note: "\* = Required Information". The main area is divided into sections: "Information" and "Product Details". The "Information" section contains fields for Purchase Order ID ("P ORDER -04"), Supplier ID ("S-102"), Order Date ("5/28/2025"), Expected Delivery Date ("6/1/2025"), and Actual Delivery Date ("6/1/2025"). The "Product Details" section includes a "Product ID" field with "product-2" selected and a "Quantity Ordered" field containing the value "3". At the bottom are buttons for "Cancel", "Save & New", and "Save".

## NEW PURCHASE ORDER DETAILS

The screenshot shows the "Order Items" tab in the Medical Inventory Management system. The top navigation bar includes links for Products, Purchase Orders, Order Items (selected), Inventory Transactions, Suppliers, Reports, and Dashboards. A search bar is at the top right. Below it, a "Recently Viewed" section lists three items: ORDER -03, ORDER -02, and ORDER-01, each with a checkbox and a dropdown menu icon. To the right is a search bar and a set of filter icons. The main table area shows a header row with columns for Order Item ID, Product ID, Description, Quantity Ordered, and Status.

## ORDER ITEMS TAB

The screenshot shows a modal window titled "New Order Item". At the top right is a search bar with placeholder text "Search..." and a close button (X). Below the title is a note: "\* = Required Information". The main area is divided into sections: "Information" and "Product details". The "Information" section contains fields for Order Item ID ("ORDER -02") and Purchase Order ID ("ORDER -02"). The "Product details" section includes a "Product ID" field with "product-2" selected and a "Quantity Ordered" field containing the value "3". At the bottom are buttons for "Cancel", "Save & New", and "Save".

## DASHBOARDS HOME

## MEDICAL INVENTORY MANAGEMENT

The screenshot shows a medical inventory management system interface. At the top, there's a navigation bar with links for 'Medical Inventory ...', 'Products', 'Purchase Orders', 'Order Items', 'Inventory Transactions', 'Suppliers', 'Reports', and 'Dashboards'. A search bar and various system icons are also at the top right. The main content area is titled 'Dashboard' and 'Medical Inventory DashBoard'. It includes a note: 'Last refreshed 3 days ago. Refresh this dashboard to see the latest data.' and a timestamp: 'As of Jun 1, 2025, 9:52 PM-Viewing as usha sree karapareddy'. A prominent feature is a donut chart titled 'Purchase Orders based on Suppliers' showing 'Sum of Total Order Cost' of '\$50'. To the right of the chart, it says 'Supplier ID S-101'. Below the chart is a link 'View Report (Purchase Orders based on Suppliers)'. The background of the dashboard has a faint topographic map pattern.
