MEDICAL INVENTORY MANAGEMENT

Introduction:

The Medical Inventory Management System is a comprehensive Salesforce application designed to streamline and manage various operational aspects of the medical inventory. It can efficiently maintain supplier details, manage purchase orders, track product details and transactions, and monitor expiry dates of products, thereby improving operational efficiency, data accuracy, and reporting capabilities.

Project Overview:

This project is a comprehensive Salesforce application to streamline and manage various operational aspects of medical inventory. The system aims to efficiently maintain supplier details, manage purchase orders, track product details and transactions, and monitor the expiry dates of products. Maintain detailed records of suppliers, including contact information. Catalog product information, including descriptions, stock levels. Monitor and track product expiry dates to avoid using expired items. Comprehensive reports to track supplier performance, and purchase orders.

MEDICAL INVENTORY MANAGEMENT

Milestone – 1

Salesforce Account

Activity 1: Creating Developer Account

1. Creating a developer org in salesforce.
2. Go to <https://developer.salesforce.com/signup>
3. On the sign up form, enter the following details :
 - First name : USHA SREE
 - Last name : KARAPAREDDY
 - Job Title : Developer
 - Work Email : ushasreekarapareddy@gmail.com
 - Company : GAYATRI DEGREE COLLEGE TIRUPATI
 - Country/ Region : INDIA

The screenshot shows the Salesforce Developer Edition sign-up page. On the left, there's a promotional banner for Agentforce with the text "Build enterprise-quality apps fast and get hands-on with Agentforce and Data Cloud." and a list of benefits. Below this is an illustration of two AI agents. On the right, the sign-up form is displayed. The form includes fields for First name (usha sree), Last name (karapareddy), Job title (Developer), Work email (ushasreekarapareddy), Company (GAYATRI DEGREE CO), and Country/Region (India). There are checkboxes for agreeing to the Main Services Agreement and a CAPTCHA "I'm not a robot". A "Sign Me Up" button is at the bottom.

salesforce.com/form/developer-signup/?d=pb

Build enterprise-quality apps fast and get hands-on with Agentforce and Data Cloud.

Sign up for your Developer Edition.

- ✓ Build apps fast with drag-and-drop tools
- ✓ Go further with Apex code
- ✓ Build AI agents with Agentforce
- ✓ Harmonize your data with Data Cloud
- ✓ Ground Agentforce with structured and unstructured data
- ✓ Integrate with anything using APIs

Agentforce

Steps

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data Cloud

First name: usha sree ✓ Last name: karapareddy ✓

Job title: Developer ✓ Work email: ushasreekarapareddy ✓

Company: GAYATRI DEGREE CO ✓ Country/Region: India ✓

Your org may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

☒ I agree to the Main Services Agreement - Developer Services and Salesforce Program Agreement. I acknowledge, as described in the Developer Documentation, (1) the Developer Edition includes autonomous and other generative AI features, and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days.

We value your privacy. To learn more, visit our [Privacy Statement](#).

☒ I'm not a robot 

Sign Me Up

4. Click on sign me up after filling these.

MEDICAL INVENTORY MANAGEMENT

Activity 2: Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account
3. Give a password and answer a security question and click on change password.

A screenshot of the 'Change Your Password' form. The form is titled 'Change Your Password' and asks the user to 'Enter a new password for lead@sb.oom'. It lists requirements: '8 characters', '1 letter', and '1 number', all of which are marked as satisfied with green checkmarks. The form contains three input fields: 'New Password', 'Confirm New Password', and 'Security Question'. The 'New Password' field shows a 'Good' status, and the 'Confirm New Password' field shows a 'Match' status. The 'Security Question' dropdown is set to 'In what city were you born?'. Below the security question is an 'Answer' field containing the text 'asdfghjkl'. A blue 'Change Password' button is at the bottom of the form. The entire form is enclosed in a red rectangular border.

MEDICAL INVENTORY MANAGEMENT

4. Then you will redirect to your salesforce setup page.

MEDICAL INVENTORY MANAGEMENT

Milestone 2 Objects Creation

Activity 1: Creating a Product Object

From the setup page

1. Click on Object Manager

2. Click on Create >> Click on Custom Object.
3. Enter the label name as **Product**
4. Enter Plural label name as **Products**

5. Enter Record Name as **Product ID**
6. Select Data Type as **Text**
7. Select Allow reports.

MEDICAL INVENTORY MANAGEMENT

8. Select Allow search.

9. Click on Save and New

Activity 2: Creating a Purchase Order Object

From the setup page

1. Click on Object Manager

2. Click on Create >> Click on Custom Object.

3. Enter the label name as **Purchase Order**

4. Enter Plural label name as **Purchase Orders**

MEDICAL INVENTORY MANAGEMENT

The screenshot shows the 'Edit Custom Object' page for 'Purchase Order'. The page has a header with 'Edit Custom Object' and 'Purchase Order'. Below the header is a 'Custom Object Definition Edit' section with 'Save', 'Save & New', and 'Cancel' buttons. The main section is 'Custom Object Information'. It contains a note: 'The singular and plural labels are used in tabs, page layouts, and reports. Be careful when changing the name or label as it may affect existing integrations and merge templates.' There are three input fields: 'Label' with 'Purchase Order' (Example: Account), 'Plural Label' with 'Purchase Orders' (Example: Accounts), and 'Object Name' with 'Purchase_Order' (Example: Account). There is also a checkbox for 'Starts with vowel sound' which is unchecked.

5. Enter Record Name as **Purchase Order ID**
6. Select Data Type as **Text**
7. Select Allow reports.

The screenshot shows the 'Enter Record Name Label and Format' section. It contains a note: 'The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.' There are two input fields: 'Record Name' with 'Purchase Order ID' (Example: Account Name) and 'Data Type' with 'Text' (Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.). Below this is the 'Optional Features' section with two checkboxes: 'Allow Reports' (checked) and 'Allow Activities' (unchecked).

8. Select Allow search.

The screenshot shows the 'Deployment Status' and 'Search Status' sections. The 'Deployment Status' section has two radio buttons: 'In Development' and 'Deployed' (selected). The 'Search Status' section has a note: 'When this setting is enabled, your users can find records of this object type when they search. Learn more.' There is a checkbox for 'Allow Search' which is checked and labeled with a red '9'. Below this is the 'Object Creation Options (Available only when custom object is first created)' section with two checkboxes: 'Add Notes and Attachments related list to default page layout' and 'Launch New Custom Tab Wizard after saving this custom object'. At the bottom are 'Save', 'Save & New' (labeled with a red '10'), and 'Cancel' buttons. There is also a 'What is this?' link and an 'Activate Windows' watermark.

9. Click on Save and New

Activity 3: Creating a Order Item Object

From the setup page

1. Click on Object Manager

The screenshot shows the Salesforce Setup page. The top navigation bar has 'Setup', 'Home', and 'Object Manager' (labeled with a red '2' and a red arrow). The 'Object Manager' dropdown menu is open, showing 'Setup Home', 'Service Setup Assistant', and 'Commerce Setup Assistant'. The main content area has a 'SETUP Home' header and a 'Create' button (labeled with a red '3' and a red arrow). There is also a 'Search Setup' bar at the top right.

MEDICAL INVENTORY MANAGEMENT

- Click on Create >> Click on Custom Object.
- Enter the label name as **Order Item**
- Enter Plural label name as **Order Items**

Custom Object Information

Required Information

The singular and plural labels are used in tabs, page layouts, and reports.
Be careful when changing the name or label as it may affect existing integrations and merge templates.

Label Example: Account

Plural Label Example: Accounts

Starts with vowel sound ☐

The Object Name is used when referencing the object via the API.

Object Name Example: Account

- Enter Record Name as **Order Item ID**
- Select Data Type as **Text**
- Select Allow reports.

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name Example: Account Name

Data Type Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

- ☒ Allow Reports
☐ Allow Activities
☐ Track Field History

- Select Allow search.

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app Experience and the mobile app.

Custom Object Tabs

Edit Del	Suppliers	 Car

MEDICAL INVENTORY MANAGEMENT

Milestone-4

The Lightning app creation

Activity 1: Create a Lightning App for Medical Inventory Management

1. From Setup, enter App Manager in the Quick Find and select App Manager.
2. Click New Lightning App.

3. Enter Medical Inventory Management as the App Name >> Click on upload image and add an image related to Medical Inventory then click next

The screenshot shows the 'New Lightning App' setup screen. The 'App Details & Branding' section is active. The 'App Name' field is filled with 'Medical Inventory Management'. The 'Developer Name' field is filled with 'Medical_Inventory_Management'. The 'Description' field is empty. The 'Image' field shows a medical cross icon. The 'Primary Color Hex Value' is set to '#0070D2'. The 'Org Theme Options' section is visible at the bottom, with a checkbox for 'Use the app's image and color instead of the org's'.

4. Under App Options, leave the default selections and click next.
5. Under Utility Items, leave as is and click Next.

MEDICAL INVENTORY MANAGEMENT

6. From Available Items, select Products, Purchase Orders, Order Items, Inventory Transactions, Suppliers, Reports, and Dashboards and move them to Selected Item and Click Next.

Navigation Items

Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the items that you add. Some navigation items are available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.

☐ External Lookup Relationship
 The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list. Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

☐ Checkbox
 Allows users to select a True (checked) or False (unchecked) value.

☐ Currency
 Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

☒ Date
 Allows users to enter a date or pick a date from a popup calendar.

☐ DateTime
 Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the DateTime field.

☐ Email
 Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

☐ Geolocation
 Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

☐ Number
 Allows users to enter any number. Leading zeros are removed.

☐ Percent
 Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.

☐ Phone
 Allows users to enter any phone number. Automatically formats it as a phone number.

☐ Picklist
 Allows users to select a value from a list you define.

☐ Picklist (Multi-Select)
 Allows users to select multiple values from a list you define.

☐ Text
 Allows users to enter any combination of letters and numbers.

MEDICAL INVENTORY MANAGEMENT

Milestone-8

Validation Rules Creation

Activity 1: To create an Expected Delivery Date Validation rule to a Employee Object

1. Go to setup >> click on Object Manager >> type object name(**Purchase Order**) in quick find box>> click on the Purchase Order object.
2. Click on the validation rule >> click on New.
3. Enter the Rule name as "**Expected Delivery Date Validation**".
4. Select Active.
5. Insert the Error Condition Formula as :
(Expected_Delivery_Date__c - Order_Date__c)> 7

Purchase Order Validation Rule

Define a validation rule by specifying an error condition and a corresponding error message. The error condition is written as a Boolean formula expression that returns true or false. When the formula expression returns true, the save will be aborted and the error message will be displayed. The user can correct the error and try again.

Validation Rule Edit [Save] [Save & New] [Cancel]

MEDICAL INVENTORY MANAGEMENT

Milestone-9

Profiles Creation

Activity 1: To create an Inventory Manager Profile

1. Go to setup >> type profiles in quick find box >> click on profiles >> clone the desired profile (Standard User) >> enter profile name (**Inventory Manager**) >> Save.

Clone Profile

Enter the name of the new profile.

You must select an existing profile to clone from.

Existing Profile	Standard User
User License	Salesforce
Profile Name	Inventory Manager

2. While still on the profile page, then click Edit.

MEDICAL INVENTORY MANAGEMENT

3. Select the Custom App settings as default for the Medical Inventory Management.

The screenshot shows the 'Profiles' setup page with a 'Custom App Settings' section. It contains two columns of app settings, each with 'Visible' and 'Default' checkboxes. The 'Medical Inventory Management (Medical_Inventory_Management)' app is highlighted with a red box, and its 'Default' radio button is selected.

4. Scroll down to Custom Object Permissions and Give access permissions as mentioned in the below diagram.

The screenshot shows the 'Custom Object Permissions' page. It has two tables of permissions. The first table lists 'Inventory Transactions', 'Order Items', and 'Products'. The second table lists 'Purchase Orders' and 'Suppliers'. Each table has columns for 'Basic Access' (Read, Create, Edit, Delete) and 'Data Administration' (View All, Modify All). A red box highlights the 'Basic Access' column for each object, showing that all permissions are checked.

5. Change the password policies as mentioned :
6. User passwords expire in should be " never expires ".
7. Minimum password length should be " 8 ", and click save.

The screenshot shows the 'Password Policies' page. It has several settings: 'User passwords expire in' is set to 'Never expires', 'Enforce password history' is set to '3 passwords remembered', 'Minimum password length' is set to '8', 'Password complexity requirement' is set to 'Must include alpha and numeric characters', 'Password question requirement' is set to 'Cannot contain password', 'Maximum invalid login attempts' is set to '10', and 'Lockout effective period' is set to '15 minutes'. There are also checkboxes for 'Obscure secret answer for password resets', 'Require a minimum 1 day password lifetime', and 'Don't immediately expire links in forgot password emails'. The 'Save' button is highlighted with a red box.

Activity 2: To create an Purchase Manager Profile

1. Go to setup >> type profiles in quick find box >> click on profiles >> clone the desired profile (Standard User) >> enter profile name (**Purchase Manager**) >> Save.
2. While still on the profile page, then click Edit.
3. Select the Custom App settings as default for the Medical Inventory Management.

MEDICAL INVENTORY MANAGEMENT

Milestone-13

Flows Creation

Activity 1 : Create Flow to update the Actual Delivery Date.

1. Go to setup >> type Flow in quick find box >> Click on the Flow and Select the New Flow >> Start From Scratch .

New Flow

Select how you'd like to start building your automation.

Start From Scratch
Select your automation type and start building on an empty canvas.

Use a Template
Select a pre-built flow and customize it to fit your needs.

Back Next

2. Select the record Triggered flow. Click on create.

New Flow

Core All + Templates

Record-Triggered Flow
Launches when a record is created, updated, or deleted. This autolaunched flow runs in the background.

Screen Flow
Guides users through a business process that's launched from Lightning pages, Experience Cloud sites, quick actions, and ...

Schedule-Triggered Flow
Launches at a specified time and frequency for each record in a batch. This autolaunched flow runs in the background.

Platform Event—Triggered Flow
Launches when a platform event message is received. This autolaunched flow runs in the background.

Autolaunched Flow (No Trigger)
Launches when invoked by Apex, processes, REST API, and more. This autolaunched flow runs in the background.

Record-Triggered Orchestration
Launches when a record is created or updated. An orchestration lets you create a multi-step, multi-user process.

Create

3. Under Object select "**Purchase Order**"

4. Select A record is created or updated

Configure Start

Select Object

Select the object whose records trigger the flow when they're created, updated, or deleted.

* Object
Purchase Order

Configure Trigger

* Trigger the Flow When:

☐ A record is created

☐ A record is updated

☒ A record is created or updated

☐ A record is deleted

MEDICAL INVENTORY MANAGEMENT

- Set Entry Conditions : None
- Select Fast Field Updates and click on Done

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements
None 5

***Optimize the Flow for:**

Fast Field Updates
Update fields on the record that triggers the flow to run. This high-performance flow runs *before* the record is saved to the database. 6

Actions and Related Records
Update any record and perform actions, like send an email. This more flexible flow runs *after* the record is saved to the database.

☐ Include a Run Asynchronously path to access an external system after the original transaction for the triggering record is successfully committed

- Under the record trigger flow click on the "+" icon and select Get Records.
- Enter Label as "**Get Purchase Record**".
- For Object select Purchase Order.
- For Condition Requirements , select All Conditions are Met(AND)
- For the first condition select as follows:

 ActualDeliveryDate ✕	Add ▼	3	

+ Add Assignment

19. Click Done
20. From the Toolbox drag and drop Update Records element and connect to the Assignment element.
21. Enter the label as "Updating Purchasing Order".
22. How to Find Records to Update and Set Their Values : Use the Purchase Order record that triggered the flow
23. Set Filter Conditions : None -Always Update Record
24. Set Field Values for the Trip Record as

Field : Actual_Delivery_Date__c

Value : {!ActualDeliveryDate}

MEDICAL INVENTORY MANAGEMENT

 Update Records ✕

*** How to Find Records to Update and Set Their Values**

- ☒ Use the purchase order record that triggered the flow
- ☐ Update records related to the purchase order record that triggered the flow
- ☐ Use the IDs and all field values from a record or record collection
- ☐ Specify conditions to identify records, and set fields individually

 Because this flow runs *before* a record is saved, you can only update the record that triggered the flow to run. To update other records, configure the trigger to run the flow *after* the record is saved.

Set Filter Conditions

Condition Requirements to Update Record

None—Always Update Record ▼

Set Field Values for the Purchase Order Record

Field	Value
Actual_Delivery_Date__c	 ActualDeliveryDate ✕

 Add Field

25. Click Done

26. Save the flow as “Actual Delivery Date Updating”.

27. Activate the flow.

MEDICAL INVENTORY MANAGEMENT

Milestone-14

Activity 1 : Create a Trigger to Calculate total amount on Order Item.

Step 1 : Login to Salesforce:

Log in to your Salesforce account with administrative privileges.

Step 2:

- i. Navigate to Setup: Once logged in, click on the gear icon ?? (Setup) located at the top-right corner of the page. This will open the Setup menu.
- ii. Click on Developer Console: Click on the "Developer Console" option from the Setup menu. This will open the Developer Console in a new browser tab or window.

Step 3:

- i. In the Developer Console window, go to the top menu and click on "File".
- ii. Select New: From the dropdown menu under "File", select "New".
- iii. Choose Apex Trigger: This will open a new Apex Trigger editor tab.

Create an Apex Trigger:

trigger CalculateTotalAmountTrigger on Order_Item__c (after insert, after update, after delete, after undelete) {

 // Call the handler class to handle the logic

 CalculateTotalAmountHandler.calculateTotal(Trigger.new, Trigger.old, Trigger.isInsert, Trigger.isUpdate, Trigger.isDelete, Trigger.isUndelete);
}

Step 4:

- i. In the Developer Console window, go to the top menu and click on "File".
- ii. Select New: From the dropdown menu under "File", select "New".
- iii. Choose Apex Class: Name it as CalculateTotalAmountHandler

MEDICAL INVENTORY MANAGEMENT

```
public class CalculateTotalAmountHandler {
    // Method to calculate the total amount for Purchase Orders based on related Order Items
    public static void calculateTotal(List<Order_Item__c> newItem, List<Order_Item__c>
oldItems, Boolean isInsert, Boolean isUpdate, Boolean isDelete, Boolean isUndelete) {
    // Collect Purchase Order IDs affected by changes in Order_Item__c records
    Set<Id> parentIds = new Set<Id>();
    // For insert, update, and undelete scenarios
    if (isInsert || isUpdate || isUndelete) {
        for (Order_Item__c ordItem : newItem) {
            parentIds.add(ordItem.Purchase_Order_Id__c);
        }
    }
    // For update and delete scenarios
    if (isUpdate || isDelete) {
        for (Order_Item__c ordItem : oldItems) {
            parentIds.add(ordItem.Purchase_Order_Id__c);
        }
    }
    // Calculate the total amounts for affected Purchase Orders
    Map<Id, Decimal> purchaseToUpdateMap = new Map<Id, Decimal>();
    if (!parentIds.isEmpty()) {
        // Perform an aggregate query to sum the Amount__c for each Purchase Order
        List<AggregateResult> aggrList = [
            SELECT Purchase_Order_Id__c, SUM(Amount__c) totalAmount
            FROM Order_Item__c
            WHERE Purchase_Order_Id__c IN :parentIds
            GROUP BY Purchase_Order_Id__c
        ];
        // Map the result to Purchase Order IDs
        for (AggregateResult aggr : aggrList) {
            Id purchaseOrderId = (Id)aggr.get('Purchase_Order_Id__c');
            Decimal totalAmount = (Decimal)aggr.get('totalAmount');
            purchaseToUpdateMap.put(purchaseOrderId, totalAmount);
        }
        // Prepare Purchase Order records for update
        List<Purchase_Order__c> purchaseToUpdate = new List<Purchase_Order__c>();
        for (Id purchaseOrderId : purchaseToUpdateMap.keySet()) {
            Purchase_Order__c purchaseOrder = new Purchase_Order__c(Id = purchaseOrderId,
Total_Order_cost__c = purchaseToUpdateMap.get(purchaseOrderId));
        }
    }
}
```

MEDICAL INVENTORY MANAGEMENT

```
        purchaseToUpdate.add(purchaseOrder);
    }
    // Update Purchase Orders if there are any changes
    if (!purchaseToUpdate.isEmpty()) {
        update purchaseToUpdate;
    }
}
}
```

Save it.

MEDICAL INVENTORY MANAGEMENT

Milestone-15

Reports Creation

Activity 1: Create a Purchase Orders based on Suppliers (Summary) Report

1. Click App Launcher
2. Select Medical Inventory Management App
3. Click on Reports tab
4. Click on New Report.
5. Click the report type as **Purchase Orders** Click Start report.

6. Click on Filters and select as follows and click on Apply

7. Customize your report, in group rows select – Supplier ID, Purchase Order: Purchase Order ID, for columns Order Count, Total Order Cost (In this way we are making a Summary Report).
8. Click save and run
9. Give report name – Purchase Orders based on Suppliers.
10. Click Save

NOTE: In this report you can see your all record of the object you selected for reporting

MEDICAL INVENTORY MANAGEMENT

(What you select in "Select a report type option")

View Report

1. Click on App Launcher on the left side of the screen.
2. Search Medical Inventory Management App & click on it.
3. Click on Reports Tab.
4. Click on Purchase Orders based on Suppliers and see records.

Activity 2: Create a Complete Purchase Details Report

1. Click App Launcher
2. Select Medical Inventory Management App
3. Click on Reports tab

MEDICAL INVENTORY MANAGEMENT

- Click on New Report.
- Click the report type as Purchase Orders with Order Items and Product ID >> Click Start report.
- Click on Filters and select as follows and click on Apply

- Customize your report, in group rows select – Supplier ID, Actual Delivery Date, Purchase Order: Purchase Order ID, for columns Product ID : Product ID, Product ID : Product Name, Order Count, Quantity Received, Amount (In this way we are making a Summary Report).
- Click save and run
- Give report name – Complete Purchase Details Report
- Click Save
